

weber murtvätt kalk/salt

- Murtvätt is a solution for washing away limestone and salt deposits both indoors and outdoors

About this product

Murtvätt is a concentrated acidic solution for washing away lime and salt deposits both indoors and outdoors. Murtvätt is gentle despite low pH. It is biodegradable. Murtvätt is a mixture of lighter acid concentrations and detergent to clean the surface without causing damage.

Area of use

Lime sandstone, bricks, ceramic tiles, natural stone, concrete, sanitary ware, wood, steel and painted surfaces. Clean from rust, lime, cement etc. OBS! Textiles and surfaces of copper, brass and aluminum must be protected.

Constraints

- Should not be used in temperatures below +5°C

Pretreatment

Pre-water the substrate well so that undissolved contaminants are sucked into the substrate.

Mixing

Shake or stir before use. Dilute murtvätt with lukewarm water 1:10. In case of heavy soiling, a stronger concentration can be used

Work instructions

Do not use the product at a temperature lower than + 5 ° C. Apply the liquid and process with a root brush. Never use a wire brush. Let work for 5 minutes. Rinse thoroughly with clean water. NOTE! This is very important especially for horizontal surfaces of concrete or mortar that otherwise will get a bad surface. Repeat the treatment if necessary. Metal surfaces are not damaged but unsightly stains can occur. Therefore, wash the entire surface and rinse very thoroughly.

Product specification

Material consumption	1l for 10-20m ²
Consistency	Easy flowing
Storage conditions	Should be stored warm. Protected against frost. Unopened packaging can be stored for 2 years. Can be used even after freezing if thorough stirring or shaking is performed.

Safety regulation

Always read the applicable safety data sheets, use personal protective equipment and follow the workplace safety regulations.

Recycling

Please visit your local weber website to find information on waste material and packagings.
